### Video Editing

Ryan Spicer
School of Arts Media and Engineering
March 3, 2010

### This was going to be about Blender...

But then, reality...

## Blender is very good at 3D graphics and animation

#### See:

- Blender Open Movie Projects:
  - Completed:
    - Elephants Dream: <a href="http://www.elephantsdream.org">http://www.elephantsdream.org</a>
    - Big Buck Bunny: <a href="http://www.bigbuckbunny.org">http://www.bigbuckbunny.org</a>
  - In Progress:
    - Sintel: <a href="http://durian.blender.org">http://durian.blender.org</a>
- Commercial projects
  - Completed
    - Plumiferos: <a href="http://www.plumiferos.com/">http://www.plumiferos.com/</a>

# Blender is pretty good at compositing

#### See:

- Student Films
  - Hangar No. 5:

http://www.blendernation.com/hangar-no5-movie-and-making-of/

### Blender is not very good at video editing.

Yet.

Blender is Open-Source.

### Places to Learn about Blender Development

- Blender developers' homepage: <a href="http://www.blender.org/development/">http://www.blender.org/development/</a>
- Blender Foundation Committers Listserve: <u>http://lists.blender.org/pipermail/bf-committers/</u>
- Community Builds: <a href="http://www.graphicall.org">http://www.graphicall.org</a>
- Blender IRC: irc.freenode.net, #blender and #blendercoders

#### **Primary Languages:**

- Blender Core is C.
- Blender API is Python.
- Blender uses the FFMPEG library for video I/O.

# This is not the place to start learning programming.

## If you know how to code, feel free to chip in.

# Okay, so we can't use Blender (yet).

#### Free (as in Speech) Video Editors:

- Linux:
  - PiTiVi: http://www.pitivi.org
  - Kino: <a href="http://www.kino.org">http://www.kino.org</a>
  - Cinelerra/Lumierra:http://www.heroinewarrior.com/cinelerra.php
- Most of these do not have Windows/Mac ports.

### Try Linux!

- LiveCDs do not install anything on your computer!
  - Dyne::Bolic
    - http://dynebolic.org/
  - AVLinux
    - http://www.bandshed.net/AVLinux.html

#### **Commercial Options**

#### Mac OS

- Apple Final Cut Express
  - 90% of the features, \$60 (Student).
- Apple Final Cut Pro
  - Multi-Camera Editing, Pro-Quality Compression, Soundtrack, etc. \$400 (Student).

#### Windows

- Adobe Premiere Pro
  - Comparable to FCP; available in some CS4 Bundles (\$500 for students)
- Pinnacle Studio
  - Meh, but Cheap

#### Free (as in Beer) Options

- Windows
  - Windows Movie Maker / Movie Maker Live!
- Mac OS
  - iMovie 6 HD
    - (more traditional interface)
    - http://en.kioskea.net/telecharger/telecharger-1238imovie-hd (used to be free on Apple's site, but now...)
  - iMovie 7/8
    - (novel interface; comes with all new Macs)

### Today's Demo is iMovie

# Most Video Editing Software Uses Similar Concepts.

### Video Editing Tasks:

- Import Media (video, audio, images, titles)
- Place media on Timeline
- Trim Clips
- Export Finished Video

Simple, Right?

#### **Getting Content**

- Capture from your cell-phone, video camera, iSight
- Save off the Web
  - KeepVid
  - Creative Commons Search
  - (convert with something like WinFF http:// www.winpenpack.com/main/download.php?view. 1093)
- Add Music/Sound
